

Exercise 4.2 Customize your Developer portal

In this exercise you will configure the following for BestRun AG:-

1. Customize the Developer Portal for BestRun AG like add in the corporate logos, BestRun social media links and more..

Prerequisite:

1. Log on to Cloud Foundry SAP Cloud Platform Cockpit and navigate to your subaccount
2. Navigate to your subaccount and choose **Security→Trust Configuration**
3. Choose an identity provider from the list. In the default scenario, you should be able to select the SAP ID Service
4. Enter your user ID from the selected IDP service. In case of **SAP ID Service**, you can enter email address of the user
5. To see the role collections assigned to this user, choose **Show Assignments**.
6. Choose **Assign Role Collection**. In the **Role Collection** dropdown, choose **Authgroup.SelfService.Admin** role.

Step	Explanation	Screenshot
1	<p>Developer portal enables you to manage your application developers. The application developers via self-register or on-board themselves in the Developer Portal. After their registration is approved by you, your application developer can browse, explore the APIs published by you from API Portal and the application developer can then subscribe to the API Products to get their own API Key and Secret which they can use while invoking the APIs.</p> <p>Launch APIPortal and click  (Navigation Links) and select Developer Portal</p>	

2	<p>Developer Portal Register page comes up.</p> <p>Click on </p> <p>.</p>	
3	<p>Enter TechED in Reason field and Select Country and click on OK</p>	
4	<p>Your request automatically gets approved and you are onboarded as an Application Developer in SAP Cloud Platform trial environment for SAP Cloud Platform API Management.</p> <p>In productive tenants, the application developers registers themselves and then API administrator of the customers have to approve the request</p>	
	<p>You will need the following roles to be assigned to view the full functionality of the Manage tab.</p> <p>AuthGroup.API.Admin AuthGroup.Site.Admin AuthGroup.Content.Admin</p> <p>Please refer prerequisite and assign roles to your user, log-out and login again</p>	

6	<p>BestRun AG would like to use their own corporate logo in their Developer portal.</p> <p>Click Manage to Navigate to Mange tab & Click Company Logo to add your own corporate logo</p>	
7	<p>BestRun IT team has shared their corporate logo under which is available in shared folder, select bestrunlogo.png</p> <p>Click on Browse to browse & upload the corporate logo from local file repository and click on Save</p>	
	<p>Corporate logo now appears on the Developer portal</p>	

8	<p>To customize Name & Description in your Developer portal, click Name and Description</p>
9	<p>Enter Build anything with our APIs in the Name field</p> <p>Enter Our APIs lets you build anything from Chat Bots, Analytics Dashboards, Mobile applications or Complex integration flows in the Description field</p> <p>. Click  to persist the changes</p>
10	<p>Name & Description of the Developer portal is updated</p>
11	<p>You can use categories to group your API Products based on your use-case or scenarios. For example, you can create an category named Hire to Retire and then group all the API Products that are part of the use-case into this single category. BestRun AG wants to use this features to categorize their API Products under the following categories:- Smart Insights, Partner Network</p> <p>To add Categories, click Navigation Categories</p>
