

## Exercise 2.3 Add Corporate Governance Policy

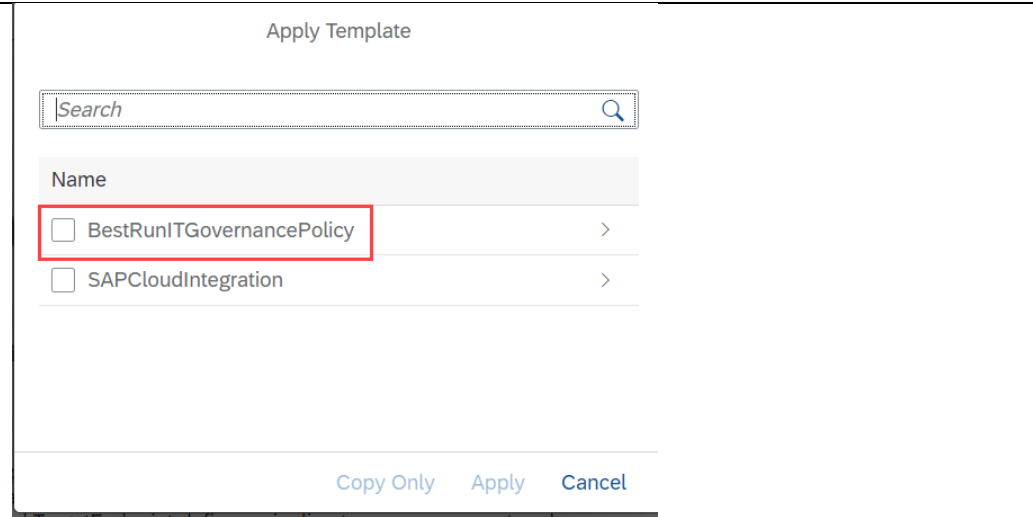

Step	Explanation	Screenshot
1	<p>Open API Proxy <b>CheckSeatAvailability</b> to add policies for BestRun IT Governance</p> <p>Click on <b>Policies</b> to open Policy Designer</p>	 <p>The screenshot shows the SAP Integration Suite API Portal. The header includes 'SAP Integration Suite' and 'API Portal'. Below the header, there's a 'View API' link and a 'Policies' button highlighted with a red box. The main content area shows the API name 'CheckSeatAvailability', its status 'Deployed', and the API Proxy URL. There are tabs for 'Overview', 'Proxy EndPoint', 'Target EndPoint', and 'Resources'.</p>
2.	<p>Click <b>Edit</b> to and then to enter into edit mode.</p>	 <p>The screenshot shows the 'Edit' button highlighted with a red box. The 'Policy Template' button is also visible. Below the buttons, there's a 'Policies' section with a list of 'Security Policies' including 'Basic Authentication', 'DecodeJWT', and 'GenerateJWT'.</p>
3.	<p>Click on <b>Policy Template</b> then select <b>Apply</b> to view all the available policy templates</p>	 <p>The screenshot shows the 'Policy Template' and 'Apply' buttons highlighted with red boxes. The 'Policy Template' button is at the top right, and the 'Apply' button is below it. The main content area shows a diagram of a message processing pipeline with a person icon and a laptop icon. Below the diagram, there's a section for 'Flow Routing properties and Scripts'.</p>

4

BestRunITGovernancePolicy template contains policies like Quota, Spike, Verify API Key as defined by the BestRun IT team

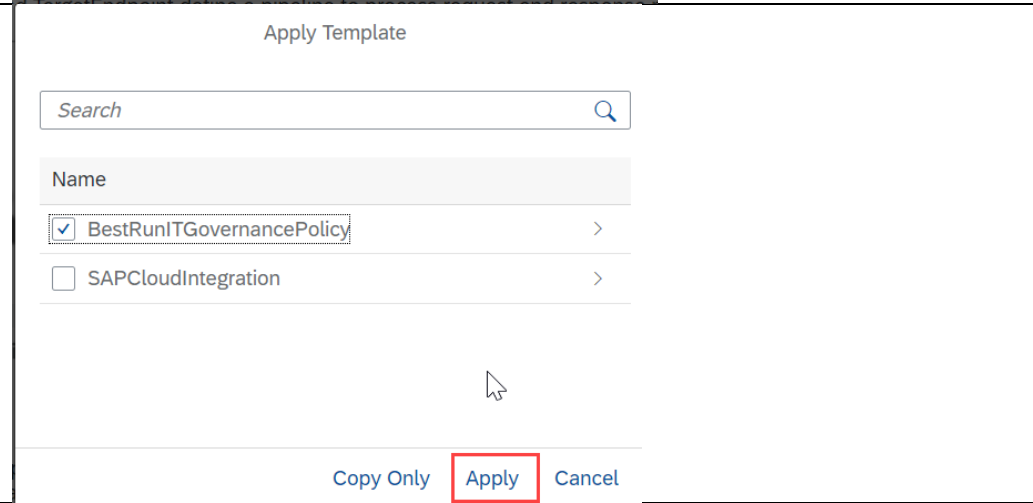

Select

☐ BestRunITGovernancePolicy

5

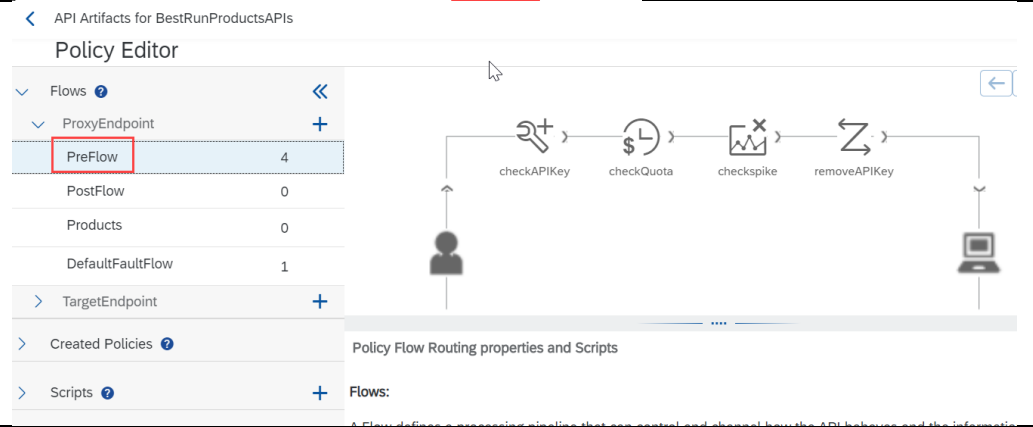

Click to **Apply** to apply the selected policy template to your API Proxy.

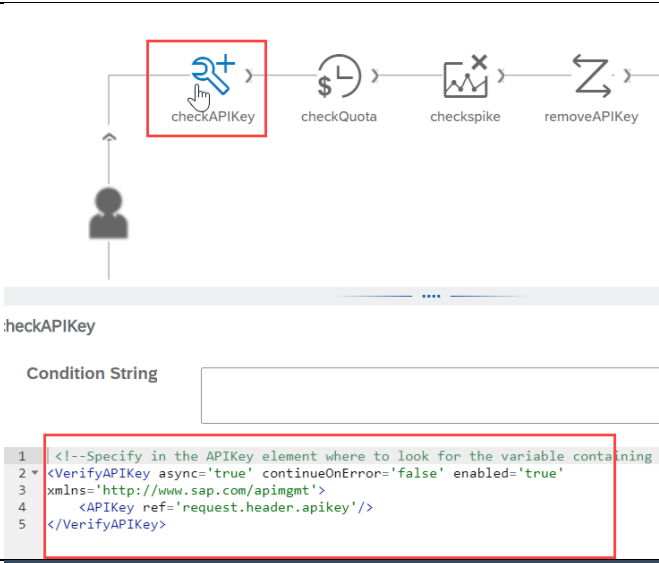

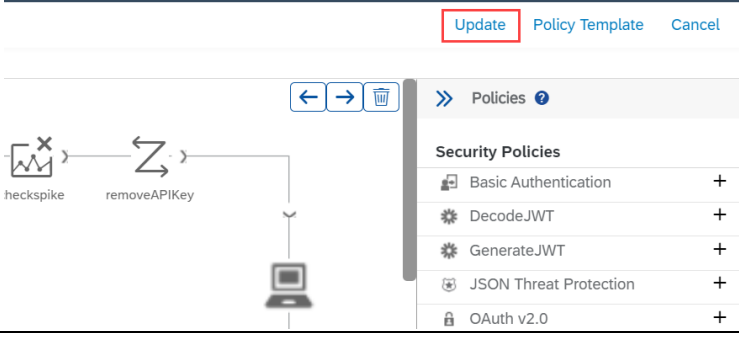

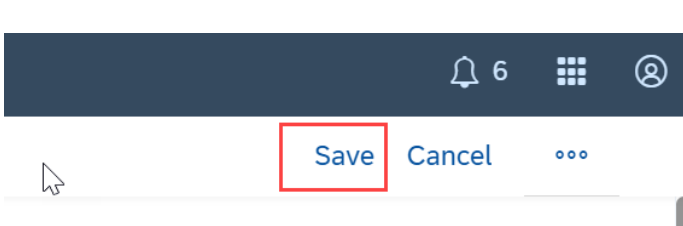

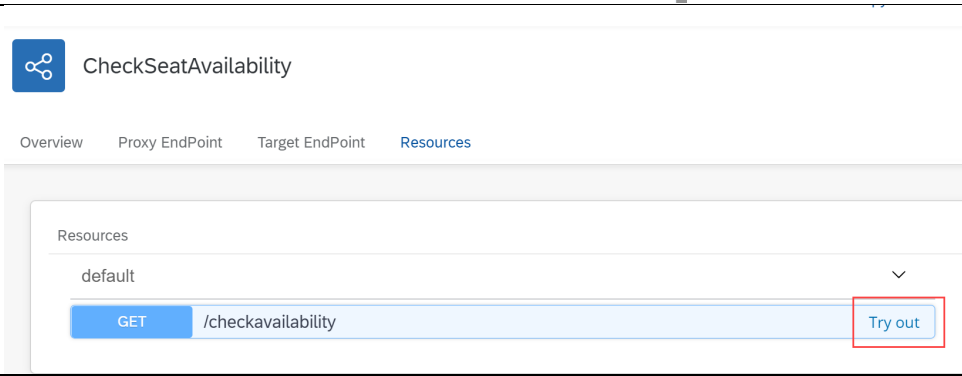

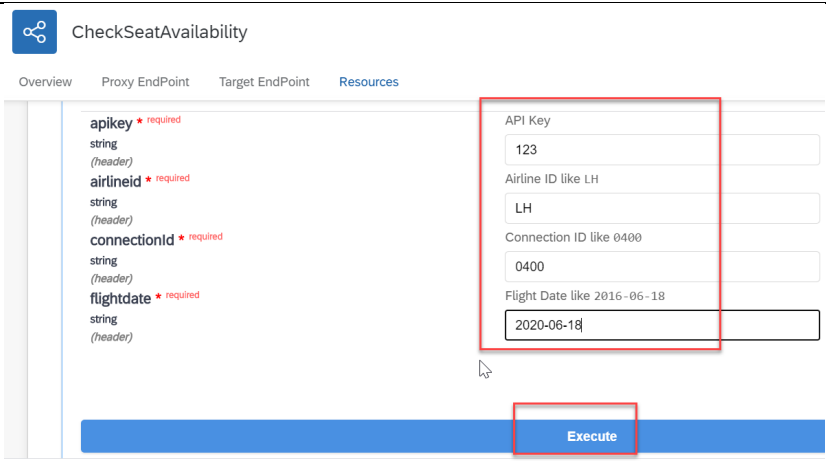

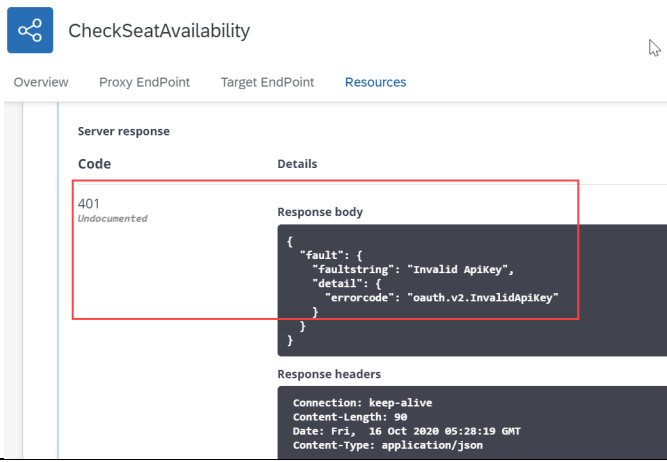

6

The selected policy template is applied on the ProxyEndpoint PreFlow

Click **PreFlow**

7	<p>You can select the applied policies from the policy flow diagram to view the policy details.</p> <p>Click  to view check api key policy details.</p>	
8	<p>Click <a href="#">Update</a> to update the policy changes</p>	
9	<p>Click <a href="#">Save</a> to persist the changes.</p>	
10	<p>Click <a href="#">Try out</a> to test the products resource.</p>	

11	<p>Enter following value:</p> <p>LH as Airline ID 0400 as Connection Id 2020-06-18 as Flight Date</p> <p>Click <b>Execute</b> to test the API Proxy</p>	
12	<p>The API key policy of the BestRun IT policy templates is applied and since no API Key was passed in the header named apikey, the call will return in an error "Failed to resolve API Key variable"</p>	
	<p>Congratulation, you have successfully applied the BestRun IT governance policy to API Proxy</p>
