

## Exercise 4.2 Customize your Developer portal

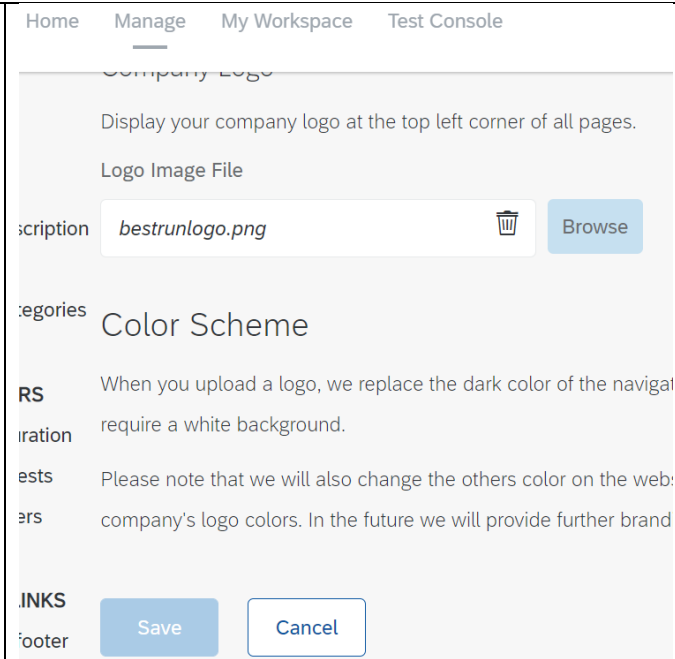

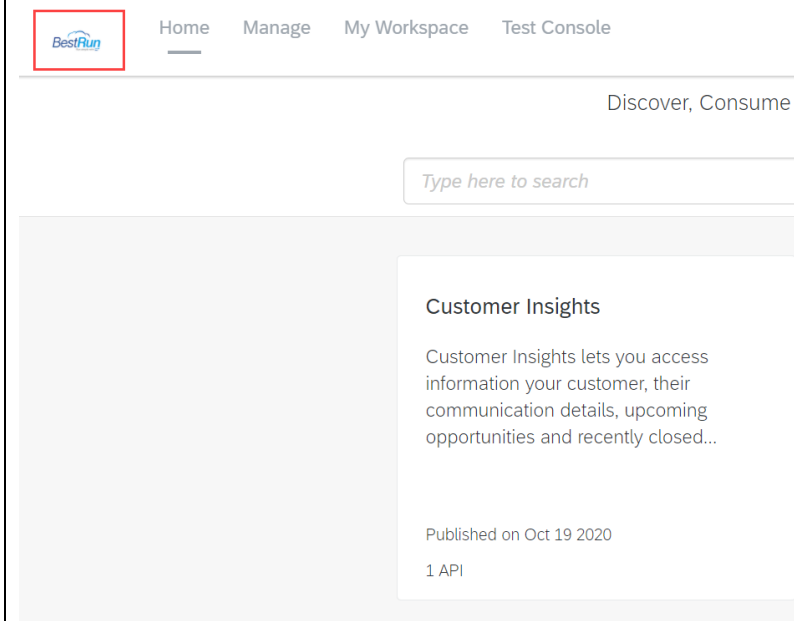

In this exercise you will configure the following for BestRun AG:-

1. Customize the Developer Portal for BestRun AG like add in the corporate logos, BestRun social media links and more..

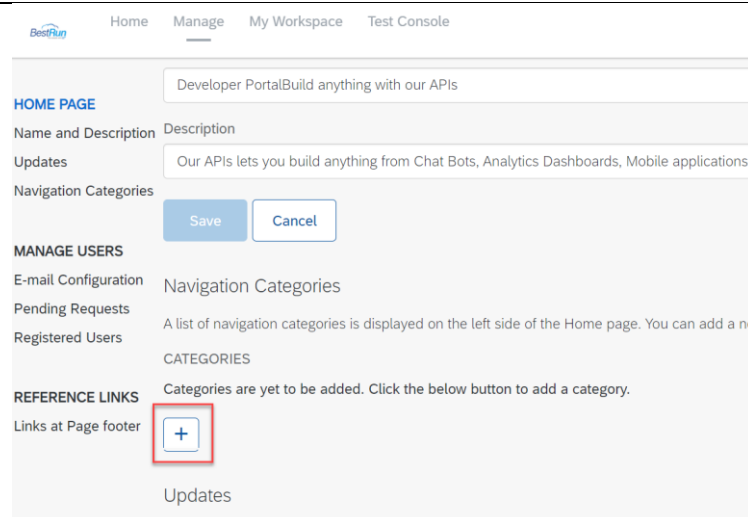

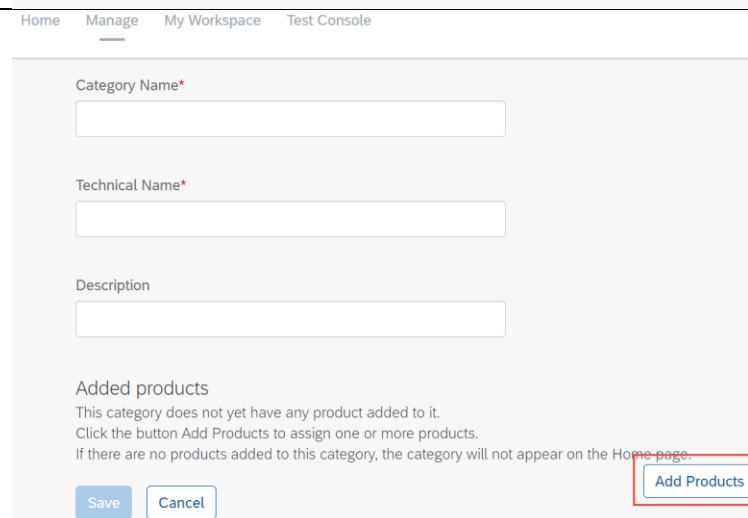

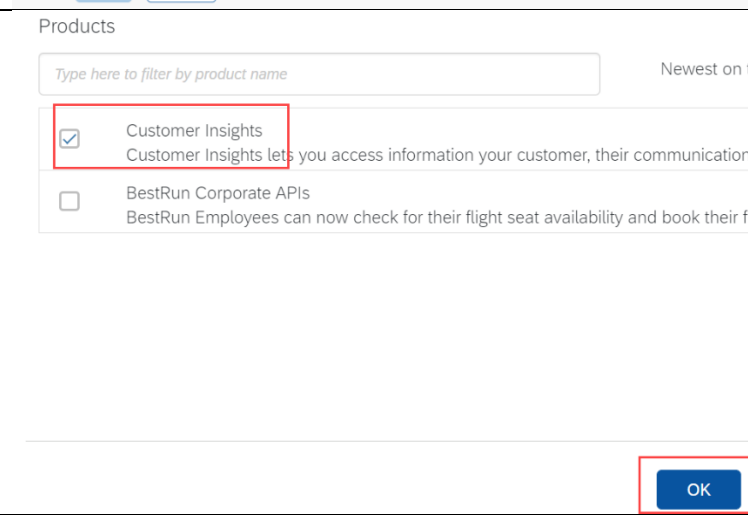

Prerequisite:

1. Log on to Cloud Foundry SAP Cloud Platform Cockpit and navigate to your subaccount
2. Navigate to your subaccount and choose **Security**→**Trust Configuration**
3. Choose an identity provider from the list. In the default scenario, you should be able to select the SAP ID Service
4. Enter your user ID from the selected IDP service. In case of **SAP ID Service**, you can enter email address of the user
5. To see the role collections assigned to this user, choose **Show Assignments**.
6. Choose **Assign Role Collection**. In the **Role Collection** dropdown, choose **Authgroup.SelfService.Admin** role.

Step	Explanation	Screenshot
1	<p>BestRun AG would like to use their own corporate logo in their Developer portal.</p> <p>Click <a href="#">Manage</a> to Navigate to Mangetab &amp; Click <a href="#">Company Logo</a> to add your own corporate logo</p>	

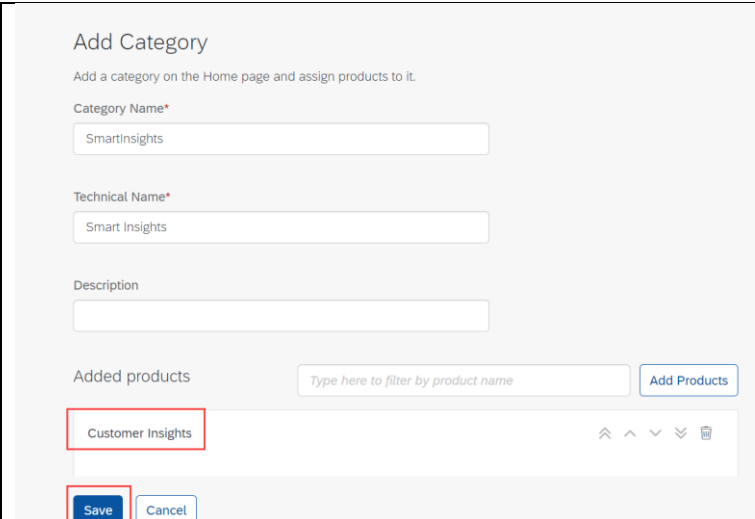

2	<p>BestRun IT team has shared their corporate logo under which is available in shared folder, select <b>bestrunlogo.png</b></p> <p>Click on  to browse &amp; upload the corporate logo from local file repository and click on </p>	
	<p>Corporate logo now appears on the Developer portal</p>	
3	<p>To customize Name &amp; Description in your Developer portal, click <a href="#">Name and Description</a></p>	

		<div><div>HomeManageMy WorkspaceTest Console</div><div>Apply your brand, manage users, and specify other details</div><div><div><div>General</div><div>Company Logo</div><div>Color Scheme</div></div><div><div>Home Page</div><div>Name and Description</div><div>Updates</div><div>Navigation Categories</div></div><div><div>Manage Users</div></div><div><div>Reference Links</div></div></div></div>
4	<div>Enter <b>Build anything with our APIs</b> in the Name field</div> <div>Enter <b>Our APIs lets you build anything from Chat Bots, Analytics Dashboards, Mobile applications or Complex integration flows</b> in the Description field</div> <div><div>Save</div></div> <div>. Click to persist the changes</div>	<div><div>WELCOME</div><div>GENERAL</div><div>Company Logo</div><div>Color Scheme</div><div>HOME PAGE</div><div>Name and Description</div><div>Updates</div><div>Navigation Categories</div></div> <div><div>Home Page</div><div>Website Name and Description</div><div>Name*Developer PortalBuild anything with our APIs</div><div>DescriptionOur APIs lets you build anything from Chat Bots, Analytics Dashboards, Mobile applications or Complex integration flows</div><div><div>Save</div><div>Cancel</div></div></div>

	<p>In case you are missing the option to add categories, then it means that the your user is missing the role AuthGroup.Content.Admin</p>
