

Exercise 4.2 Customize your Developer portal

In this exercise you will configure the following for BestRun AG:-

1. Customize the Developer Portal for BestRun AG like add in the corporate logos, BestRun social media links and more..

Prerequisite:

1. Log on to Cloud Foundry SAP Cloud Platform Cockpit and navigate to your subaccount
2. Navigate to your subaccount and choose **Security→Trust Configuration**
3. Choose an identity provider from the list. In the default scenario, you should be able to select the SAP ID Service
4. Enter your user ID from the selected IDP service. In case of **SAP ID Service**, you can enter email address of the user
5. To see the role collections assigned to this user, choose **Show Assignments**.
6. Choose **Assign Role Collection**. In the **Role Collection** dropdown, choose **Authgroup.SelfService.Admin** role.

Step	Explanation	Screenshot
1	<p>Developer portal enables you to manage your application developers. The application developers via self-register or on-board themselves in the Developer Portal. After their registration is approved by you, your application developer can browse, explore the APIs published by you from API Portal and the application developer can then subscribe to the API Products to get their own API Key and Secret which they can use while invoking the APIs.</p> <p>Launch APIPortal and click  (Navigation Links) and select Developer Portal</p>	

2	<p>Developer Portal Register page comes up.</p> <p>Click on </p> <p>.</p>	
3	<p>Enter TechED in Reason field and Select Country and click on OK</p>	
4	<p>Your request automatically gets approved and you are onboarded as an Application Developer in SAP Cloud Platform trial environment for SAP Cloud Platform API Management.</p> <p>In productive tenants, the application developers registers themselves and then API administrator of the customers have to approve the request</p>	
	<p>You will need the following roles to be assigned to view the full functionality of the Manage tab.</p> <p>AuthGroup.API.Admin AuthGroup.Site.Admin AuthGroup.Content.Admin</p> <p>Please refer prerequisite and assign roles to your user, log-out and login again</p>	

6	<p>BestRun AG would like to use their own corporate logo in their Developer portal.</p> <p>Click Manage to Navigate to Mangetab & Click Company Logo to add your own corporate logo</p>	 <p>The screenshot shows the 'Manage' tab selected in the top navigation bar. Below the navigation bar, there are several sections. The 'General' section is expanded, showing 'Company Logo' and 'Color Scheme' links. The 'Company Logo' link is highlighted with a red rectangular box. Other visible links include 'Home Page', 'Name and Description', 'Updates', 'Navigation Categories', 'Manage Users', and 'Reference Links'.</p>
7	<p>BestRun IT team has shared their corporate logo under which is available in shared folder, select bestrunlogo.png</p> <p>Click on Browse to browse & upload the corporate logo from local file repository and click on Save</p>	 <p>The screenshot shows the 'Company Logo' configuration page. The 'Company Logo' link is highlighted with a red box. Below the link, there is a text area with the instruction 'Display your company logo at the top left corner of all pages.' and a 'Logo Image File' section. The 'bestrunlogo.png' file is selected, and the 'Browse' button is highlighted. Below the file selection, there is a 'Color Scheme' section with a 'Save' button highlighted.</p>
	<p>Corporate logo now appears on the Developer portal</p>	 <p>The screenshot shows the Developer portal home page. The 'BestRun' logo is visible in the top left corner, highlighted with a red box. The page title is 'Discover, Consume'. Below the title, there is a search bar with the placeholder text 'Type here to search'. The main content area shows a 'Customer Insights' section with a description and a 'Published on Oct 19 2020' date.</p>

8	To customize Name & Description in your Developer portal, click Name and Description
