## 2.1 - Manage REST APIs from SAP Cloud Platform Integration

# Overview

BestRun AG would like to offer to their corporate employees a mobile and chat bot application to check for flight seat availability and book their corporate trip request.BestRun AG in the long-term plan to migrate to SAP Concur to automate their employee trip requests For building the mobile and chatbot application, they require RESTFul APIs with interactive API documentation so that their application developers can build this mobile and chatbot application.
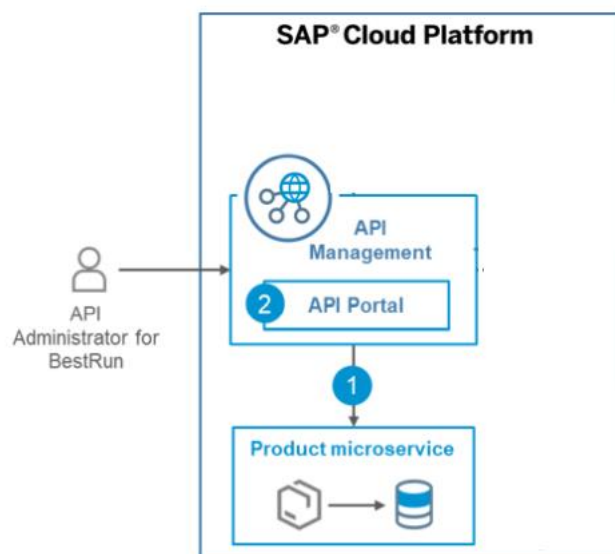

IT team of BestRun AG has used SAP Cloud Platform Integration to build a REST APIs that connects to their Business application
