2	Click ☰ to collapse the menu items pane.	☰ **SAP** Integration Suite ⌂ Home ⊘ Discover ✎ Develop 🔍 Configure 💲 Monetize 📈 Analyze 📋 Test

|		
3	Click **Create** to create an API Proxy to your non- SAP CRM connector.	**Develop** Create APIs, Products, import Policy Templates and view Applications here. APIs (3) Products (0) Applications (0) Policy Templates (0) Create
4	You can select the API Provider from the providers drop down. Click and select the newly created Open Connectors API Provider. BestRunOpenConnectors	**Create API** Select: ● API Provider ○ API Proxy ○ URL API Provider:* Select ☑ Link API Prov BestRunOpenConnectors URL* ? API Details Name:* Title:* API State:* Active
5	You can discover all the connector instances available in your selected SAP Cloud Platform Open Connectors provider. Click **Discover »** to discover the newly created non-SAP CRM connector instance.	**Create API** Select: ● API Provider ○ API Proxy ○ URL API Provider:* BestRunOpenConnectors Discover URL* ? API Details
6	All available connectors in the selected SAP Cloud Platform Open Connectors API Provider is shown. The connector instances are grouped by the connector name. You can select and expand the connector type to show all the connector instances available. Click . > HubSpotCRM	← Create API Search > HubSpotCRM

|		
7	The number of connector instances shown in this dialog may vary based on the instances available in your SAP Cloud Platform Open Connectors. You can select a non-SAP CRM connector instance of your choice or proceed with the non-SAP Connector created in the exercise 1 of this chapter. Click ○ BestRunCRM or non-SAP CRM connector instance as created by you.	
8	Click **OK** to select the connector instance.	
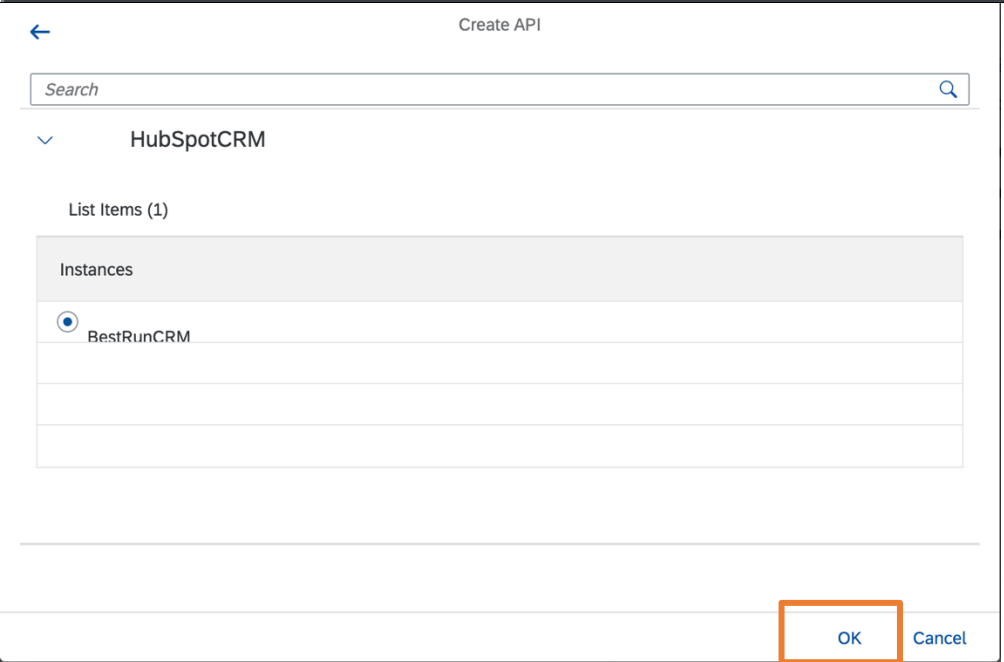

9	API Details section would be populated based on your selected non-SAP CRM connector instance. You can always change this value. Change the name of the API Proxy from to **HubSpot CRM** **BestRunCRMAPIs**	Create API Select: ⦿ API Provider ◯ API Proxy ◯ URL API Provider:* BestRunOpenConnectors ▾ [Discover] ☑ Link API Provider ❓ URL* ❓ /elements/api-v2/ API Details Name: [HubSpot CRM] Title:* HubSpot CRM API State:* Active ▾ Host Alias:* ❓ fb9f50c5trial-trial.integrationsuitetrial-apim.us10.hana.ondemand.com ▾ API Base Path:* ❓ /HubSpotCRM Version: Service Type: REST ▾ Documentation ❓ (YES ⬤) Create Cancel
10	Similarly change the title from HubSpot CRM to APIs to get customers and customer related information.	Create API Select: ⦿ API Provider ◯ API Proxy ◯ URL API Provider:* BestRunOpenConnectors ▾ [Discover] ☑ Link API Provider ❓ URL* ❓ /elements/api-v2/ API Details Name:* BestRunCRMAPIS Title:* [HubSpot CRM] API State:* Active ▾ Host Alias:* ❓ fb9f50c5trial-trial.integrationsuitetrial-apim.us10.hana.ondemand.com ▾ API Base Path:* ❓ /HubSpotCRM Version: Service Type: REST ▾ Documentation ❓ (YES ⬤) Create Cancel
11	You might have to use the Scroll mouse down option to scroll down to **API Base Path** option in case this is not visible in your screen resolution. You can change the API Base Path from /HubSpotCRM to **/bestrun/customers** and set **Version** to 1 in the version textbox	Create API Select: ⦿ API Provider ◯ API Proxy ◯ URL API Provider:* BestRunOpenConnectors ▾ [Discover] ☑ Link API Provider ❓ URL* ❓ /elements/api-v2/ API Details Name:* BestRunCRMAPIS_1 Title:* HubSpot CRM API State:* Active ▾ Host Alias:* ❓ fb9f50c5trial-trial.integrationsuitetrial-apim.us10.hana.ondemand.com ▾ API Base Path:* ❓ /1/bestrun/customers Version 1 Service Type: REST ▾ Documentation ❓ (YES ⬤) Create Cancel
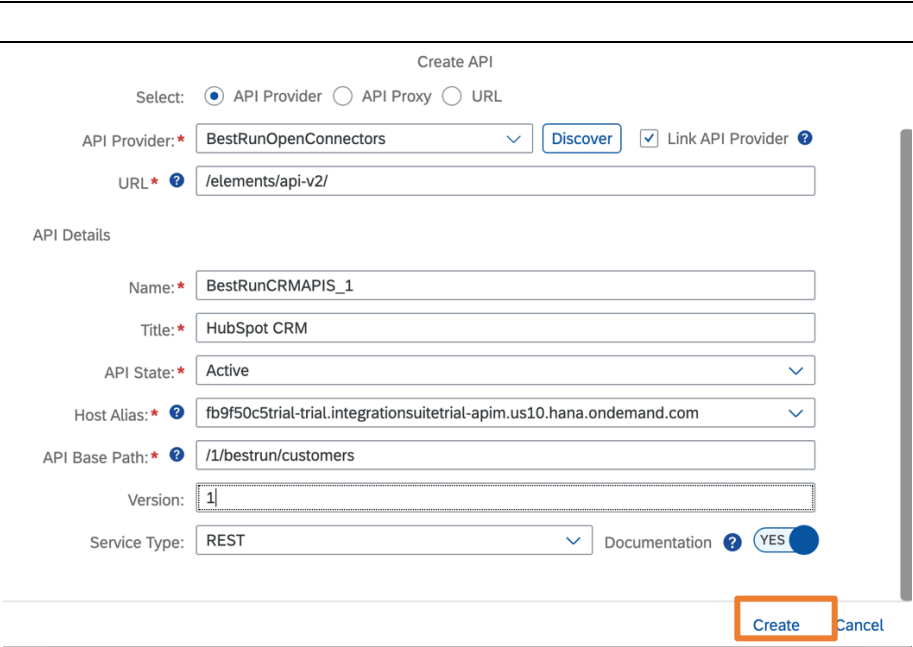

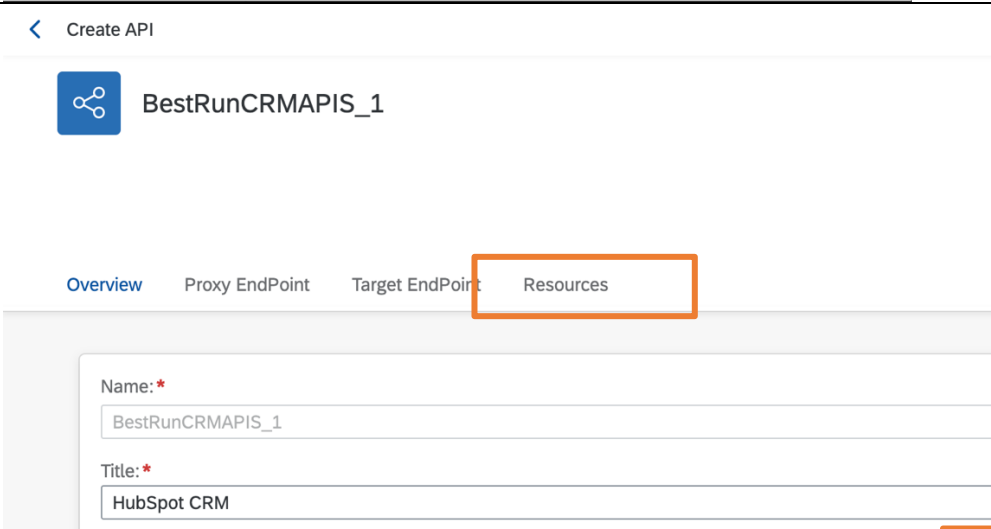

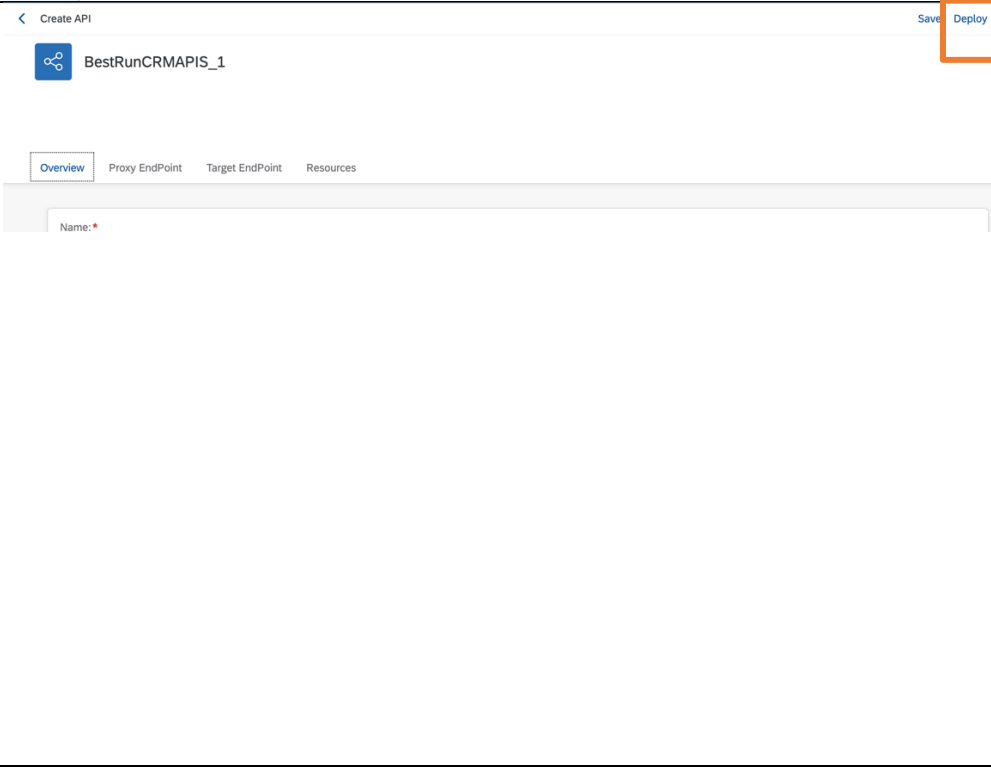

12	Click **Create** to create the API Proxy to your non-SAP CRM connector	
13	Click **Resources** to view OpenAPI based interactive API documentation.	
14	You would have to deploy the API Proxy to activate the API Proxy endpoint. Click **Deploy** Testing an API Proxy which is **Not Deployed** would cause error "Unable to find host" error. Congratulations, you have successfully discovered and created an API Proxy to your non-SAP CRM connector instance. In the next exercise, you will be adding the IT governance policy of BestRun AG.	

	Congratulations, you have successfully deployed the API . In the next exercise we will look how to add policies and manage these APIs
